FACT turns raw data into information. With it's highly configurable nature, **FACT** presents KPIs that accurately reflect your organization's priorities and values.

FACT is an effective Business Intelligence (BI) platform that presents actionable information in alignment with the organization structure and depending on each users role and area of responsibility.

FACT presents a personalized view of the KPIs most relevant to you, as well as an enterprise perspective to clearly show how these granular metrics fit into the overall company strategy.

Population Health

	% Current	% Goal
Obese Adults	18	20
Smoking Adults	17	25
Asthma	27	12
Arthritis	27	15
CHF	14	15
CAD	28	15
Diabetes	29	25
CRC Screening	73	5
30 Day Readmission	39	7

Fact!

Financial, Analytical, Clinical Trends

A GLOBAL IT LEADER

EHR Evolution has been transforming healthcare delivery to create empowered and informed consumers. With over 20 years of healthcare, clinical, operational and technical experience, our team has been not only been implementing but also helping users adapt to the numerous healthcare solutions and effectively use the data culled from these disparate systems, connecting all the systems into a unified platform in a meaningful way to enforce better outcomes.
