A Caller Line Inquiry App for your practice

Join the revolution. EHR Evolution, a revolutionary mode to your EHR adoption!

EHR Evolution believes that a clear understanding of your clinical workflows and applications and their maintenance is vital to your success. Towards that goal, we offer a tailored solution for your practice.

We are proud to offer **link!** Our app integrates with your Electronic Health Record or Practice Management System seamlessly. It allows your call agent and patients to communicate in an efficient way.

Through interactive voice response process, the app confirms the patient's primary phone number. The primary phone number is used to identify the patient. Once identified, the patient's information is pulled to your call agent's desktop to assist the patient further with their record at hand.
