**Advantage!**

# *Implementing, Integrating and Enhancing Scalable Solutions for the most challenging Policy, Technology, and Management Issues*

- Founded in 2008
- Woman and Minority Owned
- Data Movement Specialists
- Solution Providers
- Federal, State/Local and Commercial

- **UEI:** R1WCKNM9NMQ5
- **CAGE Code:** 6TUX1
- **DUNS Number:** 012345876
- **MBE :** CR21500
- **WBE :** WOSB191352
- **SWAM :** 702518
- **GSA MAS:** 47QTCA20D00CA
- **SINs:** 54151HEAL & 54151S

**Implement:** We provide breakthroughs through building systems that are rapidly iterated, continuously improved and inherently positioned for rapid evolution

**Integrate:** We deliver strategic interoperability by increasing the value and usability of integrated information

**Evolve:** We implement systems with optimum value and usability which is key for the breakthrough of rapid evolution

# Empowering Seamless Data Movement: Unlock Efficiency and Reliability with eEvolution

- We specialize in seamless data movement
- We ensure critical information flows effortlessly across systems and platforms
- We streamline your data journey for optimal efficiency and reliability
- We have Healthcare domain knowledge for comprehensive problem-solving
- We address the challenges of today and anticipate the needs of tomorrow.

Franciscan Alliance : Migrated multiple Allscripts instances to an Epic instance through our migration viewer that enabled view and selective migration of legacy clinical information in 6 weeks.

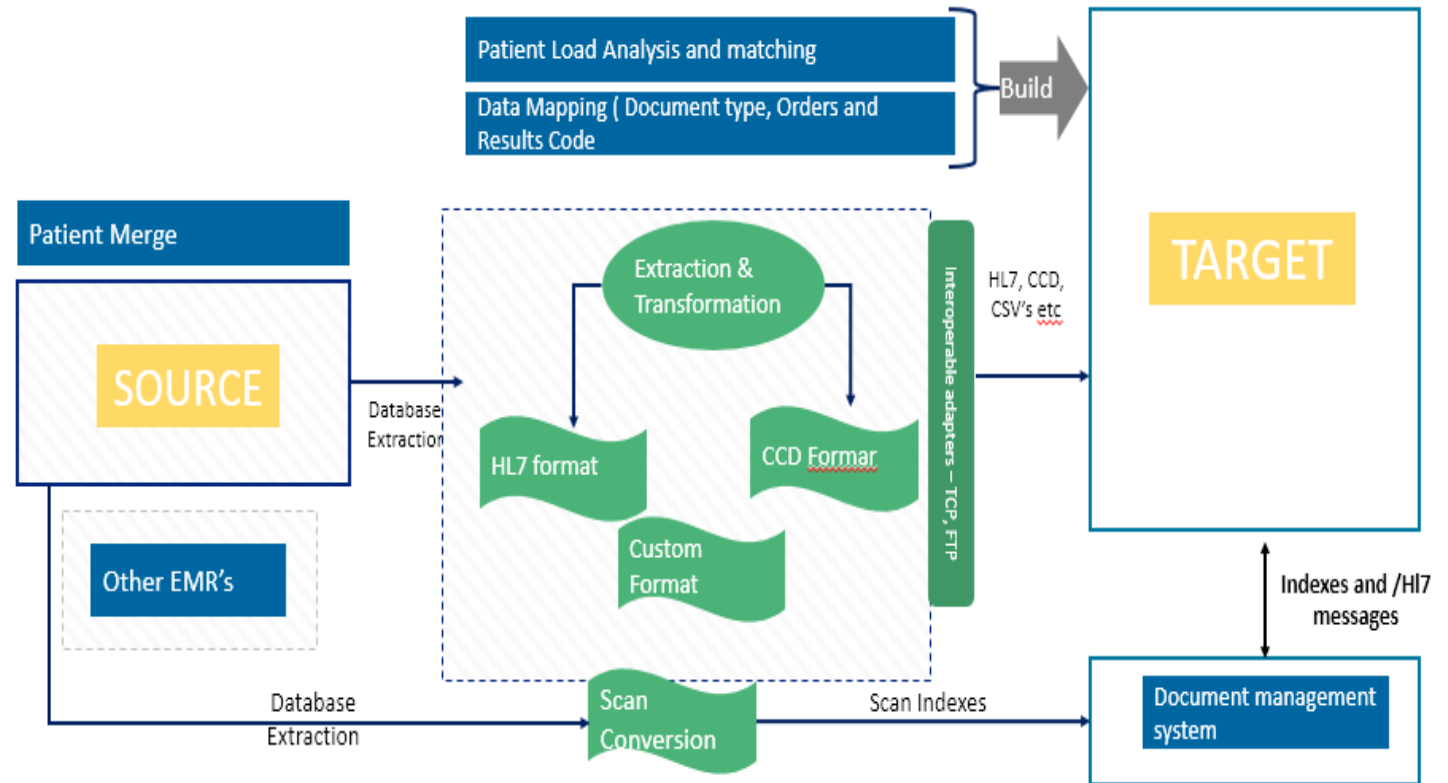

Archival Vendors : Provided comprehensive ETL services tailored specifically for archival vendors, ensuring seamless extraction, transformation, and loading of data for optimal archival management.  
Over 200 different systems across 5 vendors since 2022.

# Mastering the art of data flow

*Our expertise lies in facilitating seamless movement of information between disparate systems and platforms*

- Clinical
- Financial
- Laboratory
- Documents & Images
- HR
- Administrative
- Supply Chain
- CRM
- ERP
- Content Management
- Ancillary datasets

*We migrate everything that contributes to the overall integrity, usability, and completeness of the transformation of the systems*

## *Post-Migration Insights: Navigating the Data Landscape*

- We utilize migrated data for in-depth analysis to extract valuable insights and trends.
- We generate comprehensive reports and visualizations to facilitate decision-making processes
- We Integrate migrated data with to enhance functionality and efficiency
- We implement data governance practices to ensure data quality, security, and compliance post-migration.
- We continuously monitor and refine data processes based on insights gained from migrated data to optimize performance and effectiveness

eEvolution led the project to provide Medical Society of Northern Virginia with Reimbursement rates and co-payment disparities analysis and dashboards built in Tableau

CenteringCounts :We built the first national database of its kind to better understand the intrinsic links in family health and to improve maternal child health outcomes through integration and evidence-based data analysis. Currently in use by over 600 sites

Franciscan Alliance : Built a migration viewer that enabled view and selective migration of legacy clinical information into the new system from the archived data repository

Kaiser Permanente : Enhanced member enrollment system to accommodate growing volumes, efficiently handle errors, provide analytical capabilities and improve the overall system performance

## *Partnering for Progress: Identifying Workflow Gaps and Crafting Tailored Solutions*

---

**FACT**—**F**inancial **A**ministrative **C**linical Trends: A single platform that unifies clinical, operational, and financial data to drive improvements using real time information.

**RAMP**—**R**isk **A**justment **M**onitoring **P**latform transforms, simplifies and improves risk-adjusted payment integrity and accuracy. Leveraging AI and ML functionality within its toolset, RAMP helps alleviate the burden of validating proper coding for optimized reimbursement by analyzing data based on specific parameters.

**LINK**— A caller line inquiry application: LINK integrates with your EHR/PMS to identify and bring the calling patients record in context which allows your call agent to communicate efficiently.

**FILE**— PDF Chart Archive: FILE converts legacy patient charts to PDF for storage.

**MOVE**—View, Select and Transfer patient data: A migration viewer that provides a view into legacy systems, enabling users to select and migrate data to new EHR systems.

# Past Performances pave the way for future success!

## TOP REFERRAL CLIENTS *Health Systems*

- Kaiser Permanente
- Inova Health Systems : Epic Community Connect
- Quillen ETSU Physicians, Tennessee
- George Washington Univ. Medical Faculty Associates
- Northwell Health
- Community Health System, Ohio
- Privia Health, Virginia
- Franciscan Alliance, Indiana
- University of Texas Physicians
- Adventist Healthcare
- Cardiology Associates
- Piedmont Healthcare
- Maine General Medical Center
- Mercy Healthcare

## TOP REFERRAL CLIENTS *Vendors*

- InterSystems
- Athenahealth
- GE Healthcare
- Harmony Healthcare IT
- Mediquant
- Triyam
- Creative Information Technology Inc.
- Medical Society of Northern VA, Virginia
- Centering Healthcare Institute

## *Connect with Us: Let's Start a Conversation*
